ETRMCore

ENHANCE YOUR ENTERPRISE ETRM IN ISO/RTO & BILATERAL MARKETS.

ETRMCore delivers targeted features to manage power delivery, trading, settlements, reporting, and compliance. If your ETRM is unwieldy, costly to upgrade, or can't keep pace with industry changes, ETRMCore can quickly replace it. ETRMCore allows you to:

Implement End-to-End ETRM Capabilities
Save time and money with a comprehensive, multi-commodity platform offering real-time data, robust analytics, and seamless workflow management.
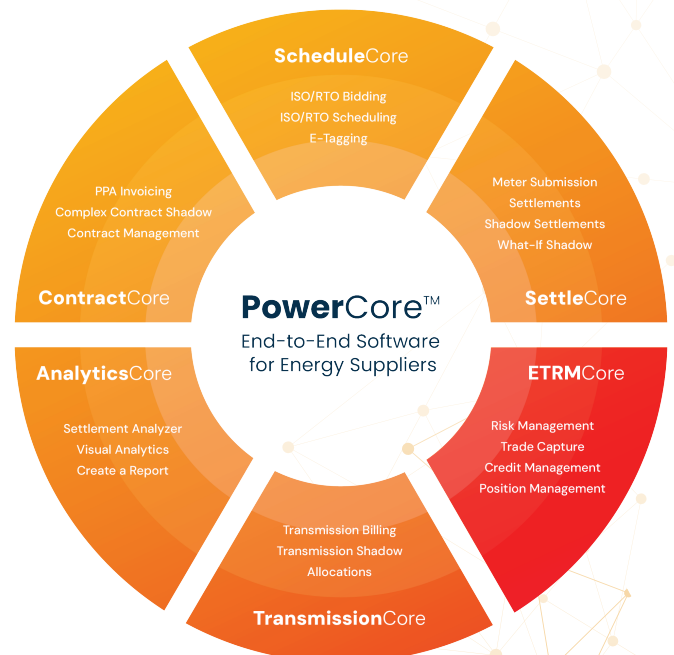

Uncover Hidden Market Opportunities
Quickly identify deal opportunities, optimize hedging strategies, and automate emissions tracking and management, improving decision-making and efficiency across all trading and risk management activities.
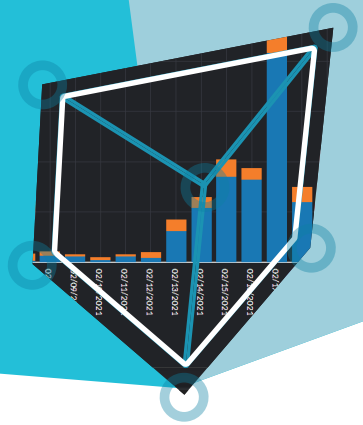

Integrate Front, Mid & Back Office
Bolt your enterprise functions together to facilitate quicker, more informed trading and scheduling decisions, ensure optimal compliance and reporting, and improve the speed and accuracy of settlements.

for Energy Suppliers

FORTIFY YOUR STRATEGIC POSITION WITH ONE ETRM TOOL.

ETRMCORE FUNCTIONALITY

- **Trade Capture** - As the cornerstone of ETRMCore, the Trade Capture module helps companies align traded, scheduled, meter, and e-Tag volumes and automate their reporting and settlement, even in complex, many-to-many relationship structures. Seamlessly integrating with any scheduling system (including ScheduleCore), Trade Capture adapts quickly to market fluctuations.

- **Credit Management** - Greatly enhance compliance with your company's risk management strategy and policies using EnergyCore Credit Management. It consolidates critical data from trader activities to counterparty exposures, and calculates daily and intra-day mark-to-market (MtM).

- **Position Management** - Manage and validate volumetric positions across portfolios and counterparties. Interface with existing ETRM systems, or deploy Position Management in a standalone mode to deliver powerful reporting and analytics.

ABOUT POWER SETTLEMENTS

Founded in 2007 and headquartered in Glendora, California, Power Settlements is a proud member of the Yes Energy family of companies.

Power Settlements partners for the long-term with a diverse array of energy suppliers to streamline and automate their operations to meet their performance, growth, and sustainability objectives.

Power Settlements' PowerCore™ platform is a best-in-class solution accompanied by a multi-component service and the industry's best client support. Together, they ensure optimal performance in a complex market terrain incorporating volatility, 24/7 operations, and ever-changing rules, policies, and workflows.
