

SettleCore

THE ULTIMATE BACK-OFFICE SOLUTION FOR ENERGY MARKET PARTICIPANTS.

SettleCore is the energy industry's most advanced back-office solutions platform incorporating meter data management, settlements, (predictive) shadow settlements, and "what-if" shadow analytics. SettleCore allows you to:

"Future-Proof" Your Back-Office

SettleCore continually adapts to the changing energy marketplace, ensuring back-office efficiency, compliant, and strategically aligned with enterprise financial goals.

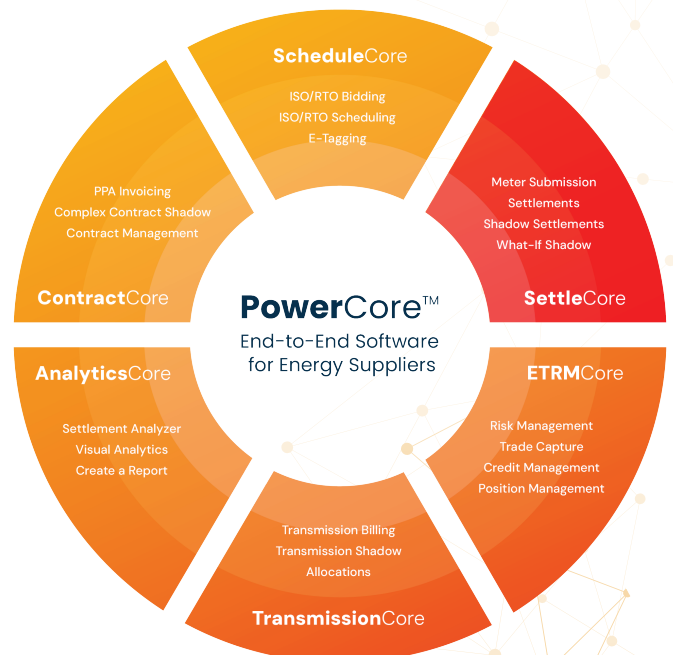

Empower "Predictive Settlements"

Gain crucial settlement intelligence that allows analysts to assess various operational scenarios and their financial outcomes, optimizing resources and improving scheduling.

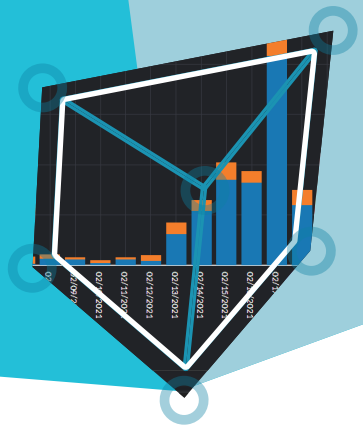

Integrate & Automate

Connect with any metering system and ensure fast, accurate submissions through customizable imports and validations. Automate the management, validation, and reporting of market settlements, freeing your team from manual tasks.

AMPLIFY YOUR ENTERPRISE BACK-OFFICE PRODUCTIVITY.

SETTLECORE FUNCTIONALITY

- **Meter Submission** - Easily connect to metering systems and automate the upload of meter data to ISOs/RTOs, converting it to the required formats and facilitating pre-submission viewing, validation, and post-submission real-time status updates.
- **ISO Settlements & Shadow Settlements** - Streamline workflows, and effortlessly access ISO files, billing determinants, and critical comparisons with shadow data. SettleCore revolutionizes the process of due diligence and validation for ISO settlement statement payables and receivables, often leading to millions of dollars in annual savings.
- **What-If Shadow** - Estimate what ISO settlements would have been if plants had operated differently. SettleCore generates vital intelligence to finetune resource optimization, scheduling, and bidding in dynamic energy markets.

ABOUT POWER SETTLEMENTS

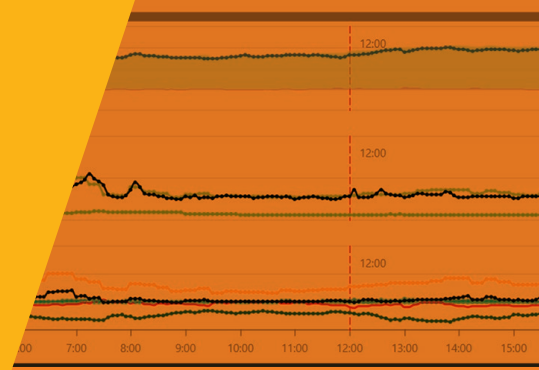

Founded in 2007 and headquartered in Glendora, California, Power Settlements is a proud member of the Yes Energy family of companies.

Power Settlements partners for the long-term with a diverse array of energy suppliers to streamline and automate their operations to meet their performance, growth, and sustainability objectives.

Power Settlements' PowerCore™ platform is a best-in-class solution accompanied by a multi-component service and the industry's best client support. Together, they ensure optimal performance in a complex market terrain incorporating volatility, 24/7 operations, and ever-changing rules, policies, and workflows.
