

TransmissionCore

OPTIMIZE YOUR TRANSMISSION BILLING, SETTLEMENT & ALLOCATIONS.

TransmissionCore optimizes transmission billing, settlement, and allocations using complex calculation methods, integrating essential operational data, and disaggregating charge code amounts to the relevant cost-causing assets.

Enhance Billing & Settlements Precision

Customize billing formulas and timelines to process settlements fast using a powerful calculation engine that aligns with enterprise workflows and market changes.

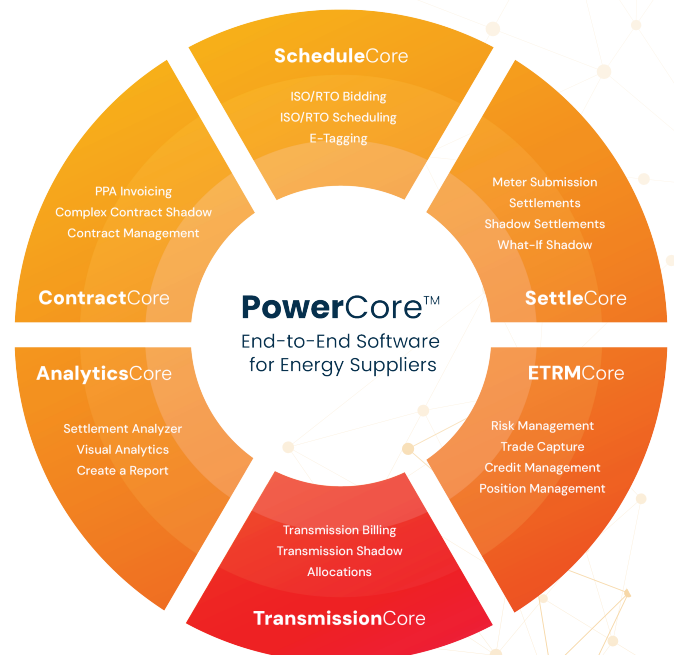

Automate & Augment Critical Workflows

Validate invoices to improve transaction confidence, automate shadow estimates and verifications per ISO standards, and better manage disputes to improve transparency and accountability.

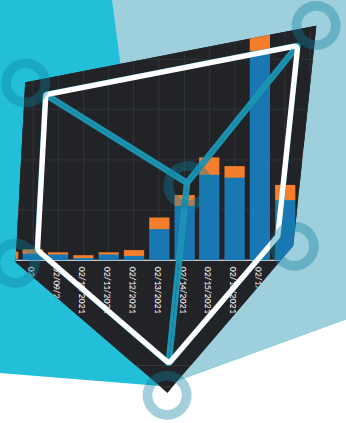

Improve Data Veracity & Augment Security

Securely store key formula variables and integrate crucial transmission invoicing data (e.g., schedule, e-Tag, and meter volumes, ISO charges and billing determinants).

TRANSMISSION BILLING & SETTLEMENT IN ONE SOLUTION.

TRANSMISSIONCORE FUNCTIONALITY

- **Transmission Billing** - Transmission Service Providers (TSPs) and other market participants use TransmissionCore to coordinate and better manage transmission billing and settlement operations while improving decision efficacy. TransmissionCore employs myriad calculation methods, from rate-based algorithms to intricate, contract-specific formulas, all within tight processing windows.
- **Transmission Shadow** - Streamlines and enhance the accuracy of financial operations for TSPs and other market participants. TransmissionCore helps market participants precisely and reliably settle millions to (in some cases) billions of dollars each year.
- **Allocations** - Automate counterparty and regulatory reporting, and asset-level P&L analysis from shadow settlements or ISO settlement statements. Disaggregate and assign charge code amounts to specific, cost-causing resources, and perform settlement analytics at the individual asset level.

ABOUT POWER SETTLEMENTS

Founded in 2007 and headquartered in Glendora, California, Power Settlements is a proud member of the Yes Energy family of companies.

Power Settlements partners for the long-term with a diverse array of energy suppliers to streamline and automate their operations to meet their performance, growth, and sustainability objectives.

Power Settlements' PowerCore™ platform is a best-in-class solution accompanied by a multi-component service and the industry's best client support. Together, they ensure optimal performance in a complex market terrain incorporating volatility, 24/7 operations, and ever-changing rules, policies, and workflows.
